

Action plan submitted by Serkan YALÇIN for Kamil Paşa İlkokulu - 10.01.2020 @ 22:53:39

**By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.**

## Infrastructure

### Technical security

- › You urgently need to get virus protection for devices that need to be protected on the school network since only some of them are protected at the moment. Just one infected device can contaminate the school's whole network and certain types of virus can even save illegal content to your server.  
You should also include a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. Check out the fact sheet on Protecting your devices against malware at [www.esafetylabel.eu/group/community/protecting-your-devices-against-malware](http://www.esafetylabel.eu/group/community/protecting-your-devices-against-malware).
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

### Pupil and staff access to technology

- › To have a policy that does not allow staff and pupils to use USB sticks is sensible and cautious but sometimes there are instances when use of USBs/removable media might be acceptable. To ensure that secure systems are maintained to the highest standards, include in your Acceptable Use Policy some information on use of removable storage devices. Check the fact sheet on Use of removable devices at [www.esafetylabel.eu/group/community/use-of-removable-devices](http://www.esafetylabel.eu/group/community/use-of-removable-devices) to make sure you cover all security aspects.
- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.

### Data protection

- › It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.

- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

## Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › Compliance with licensing agreements is important. Someone needs to have overall responsibility to ensure that this is happening and that all licenses are valid for purpose. Staff should be briefed on who is the person responsible.  
The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

## IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teachers can benefit from new technologies while still staying inline with school policy.

# Policy

## Acceptable Use Policy (AUP) Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).
- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

## Staff policy

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of

misuse.

- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.

## Pupil practice/behaviour

- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

## School presence online

- › We recommend that you specifically nominate a web-experienced staff member to periodically check the school's online reputation. Monitoring such an important aspect on an ad hoc basis only is insufficient. Remember that this is the image that prospective parents will receive when they search for your school online.
- › Check the fact sheet on Taking and publishing photos and videos at school ([www.esafetylevel.eu/group/community/taking-and-publishing-photos-and-videos-at-school](http://www.esafetylevel.eu/group/community/taking-and-publishing-photos-and-videos-at-school)) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

# Practice

## Management of eSafety eSafety in the curriculum

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at [www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum](http://www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum).
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and

consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).

- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum

## Extra curricular activities

- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to [info-insafe@eun.org](mailto:info-insafe@eun.org).

## Sources of support

- › All staff should have some responsibility for eSafety. School counsellors, nurses etc. are well placed to provide advice and guidance on these issues and should be invited to contribute to developing and regularly reviewing your School Policy. Consider whether it is appropriate to provide training for these staff.
- › It is good that there is an informal network of 'eSafety expert' pupils in your school. Explore ways to strengthen this, maybe through optional courses and/or school rewards on eSafety topics or similar.
- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetymodel.eu/group/community/information-for-parents](http://www.esafetymodel.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.

## Staff training

- › In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).
- › All teachers should be able to recognise signs of cyberbullying and be aware on how to best proceed. Make sure that your teachers are regularly trained bearing in mind the rapid changes of new technology. Also check the eSafety fact sheet on Cyberbullying at [www.esafetymodel.eu/group/community/cyberbullying](http://www.esafetymodel.eu/group/community/cyberbullying).

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
